ACKNOWLEDGMENTS

As in the original enterprise, I was fortunate to have the assistance of many. I am most indebted to my Colombian friend Jose Florez, whose research and contributions have been invaluable; to Mariángela and Peter Litwin for reading the entries and making suggestions; to Salvador Herrán for suggestions on Mexican slang, particularly soccer; to Yvette Cruz, for suggestions on Cuban expressions; to Pepe Gomez Trabadela and Candido Gomez Benitez for help with slang from Spain, and to Cesar Herrera for help with some military terms. I am equally indebted to Diana Collins who did the final corrections and insertions to the manuscript. And finally, as in the first edition, to my wife Soledad for her patience and support.

PREFACE

What Is Slang?

In the preface of *Dictionary of American Slang, Second Supplemented Edition*, Stuart Berg Flexner says that American slang, “. . . is the body of words and expressions frequently used by or intelligible to a rather large portion of the American public, but not accepted as good, formal usage by the majority.” He adds that, “American slang tries for a quick, easy, personal mode of speech. It comes mostly from cant, jargon, and argot words. . . .” Most of us know what slang is and we recognize where, when, and how we can use it. We know the formal or “correct” word for things, we know some of the alternative words for them, and most of us even know the taboo words that we usually don’t employ in mixed company. When in doubt, we consult a dictionary. Flexner says, “Slang is best defined by a dictionary that points out who uses slang and what ‘flavor’ it conveys.” This dictionary has many flavors.

What Kind of Slang Do You Have Here?

North Americans tend to think of Spanish as being divided into many dialects, even though it is the official language of 21 countries and the second language of the United States. In the preparation of this dictionary, correspondents and informants from all the countries where Spanish is spoken were asked to list terms and expressions that were uniquely native to their lands. As expected, the majority of terms listed were shared with other Spanish-speaking countries and many had their origin in Spain. Spanish is a rich paella of a language, seasoned with the flavors and spices of slangs from all the countries that speak it. That is what *Dictionary of Spanish Slang* provides: an alphabetically arranged collection of national and supranational slang terms and colloquial expressions.

Why a dictionary of Spanish slang or any slang for that matter? The writer, the artist, the dramatist, the cinematog-

rapher and anyone who strives for reality in human communication will use slang because slang is what we all use. Slang is everywhere, in books, magazines, film, video, at home, in school, in the courtroom, even in church. Therefore, a dictionary of Spanish slang will be useful to the learner who wishes to more thoroughly understand the language used in daily life.

Where Did We Get All These Words and Expressions?

Over the thirty years that I have been a student of Spanish (and English) I have been jotting down words. As an interpreter and translator I have been looking up words and expressions as part of my work. My sources have been students, housewives, businessmen, murderers, drug addicts, drug pushers, artists, bankers, accountants, colleagues, teachers, professors, interpreters, and translators.

Spanish-language media is a rich source of material. Spanish-language films readily available in the U.S. thanks to many video outlets are another source. The internet is a cornucopia of information for the lexicographer. One can connect to www.mundohispano.net and from there to all the major Spanish-language periodicals. Through the internet came the most recent entries in the Dictionary, “*Emilio*” and “*Ismael*,” both being used for the ubiquitous “E-mail.”

Interest in slang in general increased with the publication of the *Dictionary of American Slang* mentioned earlier. In Spain, Camilo José Cela became a “slangologist” when he published his *Diccionario Secreto*. Victor León advanced our knowledge of peninsular Spanish slang in 1980 with the publication of his landmark *Diccionario del Argot Español* (Alianza Editorial, Madrid). Other works consulted in the preparation of this work are *Diccionario de Voces Coloquiales de Puerto Rico* by Gabriel Vicente Maura (Editorial Zemi, 1984) and *Diccionario del Argot y Jerga Limeño o Jerga Criolla del Perú* by Guillermo E. Bendezú Neyra (Editora e Importadora Lima). No investigator of Mexican slang can avoid the rich reference provided in *Picardía Mexicana*.

by A. Jimenez (Editores Mexicanos Unidos), Bernard H. Hamel's *Bilingual Dictionary of Mexican Spanish* (Bilingual Book Press, 1996), and *The Dictionary of Chicano Spanish* by Roberto A. Galván and Richard V. Teschner (National Textbook Company, 1989).

How Is the Information Organized?

Our information is organized in the following way:

- 1. THE SPANISH WORD OR IDIOM IS LISTED IN CAPS AND BOLD.**
- 2. The region, part of speech, tone, and category are listed in lower-case italics.*
- 3. A definition is given in standard English, followed when possible by one or more English slang equivalents.*
- 4. A Spanish-language example follows. The entry word or phrase appears in lowercase italics.*
- 5. “An English-language translation of the Spanish example, set off with quotation marks, appears at the end.” English slang is used when possible.*

These translations are quite liberal. Rather than attempting to match metaphor for metaphor we have opted to convey the meaning using metaphors that would be more understandable to American English readers. For example, the Spanish “*Es más campo que las amapolas*” (lit. He is more country than the poppies) is translated as “He’s more country than the Grand Ole Opry,” since the Spanish allusion to the poppy flower would not convey the same feeling of country as the image of the Grand Ole Opry conveys in English.

Verbs are presented in the infinitive form.

DESCOJONARSE, *Spain, prnl. v.* To break up laughing. *Nos descojonamos viendo las películas antiguas de Cantinflas.* “We cracked up laughing, watching the old Cantinflas movies.”

Nouns are listed in the masculine form except when the entry is only for the feminine. **ARAÑA**, *Spain, n.* Opportunist. (Lit. Spider.) *Ese es una araña.* “That guy is a hustler.”

Adjectives are listed with both the masculine and feminine endings. When the entry could be an adjective or a noun it is so indicated. **COLADO, DA**, *L.Am./S, adj. or n.* Party crasher. *Ese tipo que está parado junto al sofá es un colado, nadie lo llamó.* “That guy standing next to the sofa is a party crasher; no one invited him.”

Idiomatic expressions are simply listed by the first word of the expression, i.e. **ALMA EN UN HILO**, *L.Am./S, idiom.* Nervous. If there is a key word, it is listed independently with a cross-reference to the idiom: **ALA** See **ESTAR TOCADO DEL ALA**.

Interjections are listed with the appropriate punctuation. **¡DALE!**, **1. L.Am./S, interj.** O.K., affirmative, let’s do it. *¿Les parece bien si vamos al boliche? ¡Dale!* “How about if we go to the bar? Let’s do it!” **2. Spain, interj.** Hit it!, Go, go! *¡Dale Rodríguez! Necesitamos un gol.* “Hit it Rodriguez! We need a goal.”

Categories

If the expression belongs to what one may consider the common bank of slang expression, no category is given. Most entries fall within this non-category, and most of what we English speakers refer to as “off color” are included here. It is not the role of the lexicographer to provide a social or moral judgement, and for this reason entries are not set apart by such classifications as “sexual,” “vulgar,” or “marginal.” The reader may make his or her own judgment. However, when the expression belongs to a very narrow category, such as criminal slang, it is listed as such. There are four categories:

- 1. Criminal slang.** This category includes terms, expressions, and idioms used by police officers, persons accused of crimes, and persons convicted of crimes.

Some of this slang comes from the prison environment (*chabolo*, prison cell), some from the police station (*braceletes*, handcuffs), and some from the street (*dar pájara*, to deceive).

- 2. Military slang.** Terms are drawn from the relatively closed society of the military service. Some of these terms do filter into everyday speech as military men and women rejoin civilian society (*milico*, G.I., *abuelo*, short-timer).
- 3. Youth slang.** This is the most volatile slang, changing almost as fast as the styles of music or clothing. This slang relates also to changes in technology and many internet terms could be considered youth slang since young people are the drivers of this technology. Many of the terms used by the young become mainstream standard slang. Consider how we are still using “cool” to express a positive opinion about something. Young Spanish speakers use *fenómeno* to communicate essentially the same idea.
- 4. Sports slang.** This is a field in itself and there is current research in progress on the changes in sports terminology. Many of the soccer terms used in Spanish for years were essentially English words, such as *fútbol*, *gol*, *penalty*. While these core words are not changing, many other terms used by sportscasters are being created, e.g., *concretar* (to score).

PREFACE TO THE SECOND EDITION

When I accepted the initial project to produce this dictionary, I had no idea of the daunting task it would be. It seemed to me that given the variety and volume of slang expressions throughout the Spanish-speaking world it would be like trying to put a thunderstorm in a bucket. Now comes the second edition and I realize that it is more like trying to put an ocean in a thimble.

In this edition I have removed some terms where the meaning given is, in fact, the legitimate meaning of the word instead of the slang meaning. In place of these I have added new expressions from general slang, military slang, sports slang, and computer slang.

I would also like to urge the reader to use care when incorporating some of these expressions into his or her vocabulary. A fairly mild expression used in Spain may be very vulgar when used in a Latin American country. Also, a word that is charged with a double meaning such as “huevos” (eggs/balls), will require extra care when shopping.

Finally, this dictionary is meant to be useful and entertaining. Enjoy!
